

Input Transformer Configuration

Ratio	Jumper	Usage
1:4	1 8 3	MI-1200
1:8	2 8 4	AG-440

* For MI1200 at 30 IPS, R11 should be added.

NOTES:

- 1) Transformer T1 is a Lundahl LL1550 input transformer.
- 2) Components R16, R11, and C9 are optional for input compensation where needed.
- 3) All diodes are type 1N914A.
- 4) All resistors are 1/4W 1% tolerance except as marked.
- 5) All electrolytic capacitors are Panasonic HF5 or HF0 series.
- 6) All film capacitors are Panasonic or Uima polypropylene types.
