

Input Transformer Configuration

Ratio	Jumper	Usage
1:4	1 8 3	MM-1200
1:8	2 8 4	RG-410

* For MM1200 at 30 IPS, R11 (22K) should be added.

NOTES:

- 1) Transformer T1 is a Lundahl LL1550 input transformer configured for 1:8 ratio.
- 2) Components R16, R17, and C9 are optional for input compensation when needed.
- 3) Resistors R19 & R20 provide a virtual ground for parasitic charge suppression.
- 4) All resistors are 1/4W 1% tolerance except as marked.
- 5) All electrolytic capacitors are Panasonic HFS or HF0 series.
- 6) All film capacitors are Panasonic or Ultra polypropylene types.
